

BPS CAPABILITY STATEMENT

Case Study: Fuel Sector & Local Government Development Applications

Project Management Capability

Bridge Project Solutions (BPS) Pty Ltd is a project management consulting, contracting and drafting services organization with highly skilled professionals experienced in delivering fuel storage projects.

Introduction—Fuel Storage Facilities

Installing fuel storage facilities presents many risks and challenges in meeting the necessary regulatory requirements to acquire development consent.

Bridge Project Solutions (BPS) has the fuel storage facility plus development consent expertise to help guide its clients through this complex process.

BPS offers its clients a preliminary study that for a small investment, can provide recommendations for the most cost effective and efficient fuel storage positioning and layout options. (Refer to layout examples). The benefits to the client are significant including, but not limited to, the following:

- Establishing the most optimal storage positioning, layout and re-fueling option(s);
- Assisting with AS1940 (storage of flammable and combustible liquids) and Dangerous Goods compliance;
- Help streamline and reduce the duration of development consent and planning approval stage;
- Outline key hazards, risks and other necessary considerations;

Preliminary Study Deliverables

At the completion of a quick, simple questionnaire by the client, BPS can provide within a short turnaround time the following deliverables that will greatly assist and guide the client understand the most cost and time efficient means of achieving development consent and planning approvals:

- Plot layout outlining suitable fuel storage location(s) and re-fueling pathways (Refer layout examples);
- Issues and constraints to achieving AS1940 and DG compliance;
- Key risks and potential risk treatment measures;
- Outline of development consent and planning approval stage;
- List of key considerations, e.g., power, lighting, security etc.

Should the client request any additional requirements, BPS would be most pleased to offer a customized preliminary study for consideration.

BPS Professional Services

BPS provides the following list of professional services on behalf of its clients;

- Manage the development consent and planning approvals process;
- Dangerous Goods type risk assessments, e.g., preliminary hazard analysis, Level 2 risk assessment;
- Project management of fuel storage facility installation and wrap around requirements, such as power, lighting, signage, security, civil works;
- Drafting;
- Constructability, safety reviews;
- Manage the procurement process;
- Stakeholder management;
